AN ISO 9001:2015 CERTIFIED COMPANY

From Chairman Desk...

“Swachh Bharat Abhiyan : Let's come together to make Swachh Bharat Abhiyan a success & realize Gandhiji's Vision Of Clean India.”

We started 17 years back and the journey till now has been full of challenges, learning, shaping ourselves better and excellent accomplishments for which, we can take pride.

Today, SKP is a company having well trained and efficient members of approximately 250+ and have co-partnered challenging tasks with giants like ONGC, IOCL, GAIL, HPCL, BPCL and many others.

SKP's technical excellence, sincere approach and methodical way of management has helped us achieve the goals that we envisioned. We are committed to expand the sphere of our activities into related fields of our business through continuously upgrading our knowledge, skills and further reinforcing positive attitude among all our members through regular training and motivation.

We work towards environmental protection and regularly sensitize our workforce. We also encourage NGOs and other agencies to pursue social causes and actively help them to ensure that our corporate social responsibilities are discharged regularly.

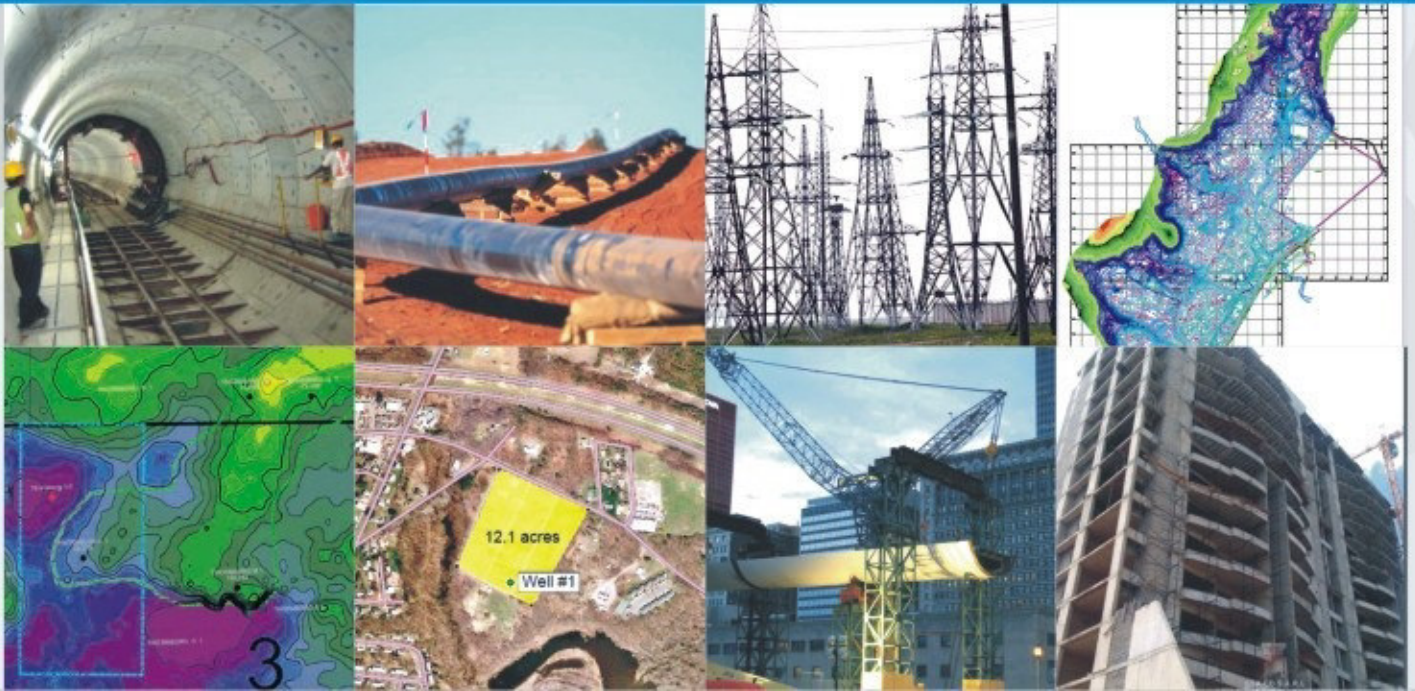

Core Competence

The following matrix model best represents SKP's core competence in business functions.

- Geochemical Survey
- Topographic & Contour Survey

The above competencies of SKP are supported by adoption of latest technologies, advanced equipment and skilled & qualified manpower. Activities performed, services provided and experience gained, to SKP's credit are highlighted below.

OVERVIEW

Our Vision

"To actively contribute to the social and economic development of the communities in which we operate at the district and taluka levels."

Making a difference

We believe in the popular adage "Give a hungry man fish for a day, he will eat it and the next day, he would be hungry again. Instead, if you teach him how to fish, he would be able to feed himself and his family for a lifetime."

Our strategy

Our focus is on the all-round development of the communities around our camp sites located mostly in distant rural areas and tribal belts. We also organize gram sabhas regularly at the village and taluka levels for spreading awareness regarding land surveys. Village meetings (Gram Sabhas) are held periodically to extend awareness about land surveys and to tell the villagers about the importance of land surveying.
